

GHIBLI ROUND 45 TOUCH

GHIBLI[®] SCRUBBER DRYERS

ROUND 45 "FAMILY"

A wide and diversified offer to match every different customer need.

ESS

Electric, single brush (21")

Control panel

25 m detachable cable

OSS

Battery operated, single brush (21"), with traction

105 Ah batteries

Drive motor

MSS

Battery operated, single brush (21")

Double knob for brush regulation

76 Ah batteries

O60

Battery operated, twin brushes (24"), with traction

Twin brushes with detachable splash guard

105 Ah batteries

Drive motor

* with 76 Ah battery ** with 105 Ah battery *** Silent Mode

GHIBLI ROUND 45 TOUCH

CONTROL PANEL WITH DISPLAY:

for an easy and intuitive control and an immediate feedback while working

“Silent mode” function activation:

perfect for day cleaning and for working in all the areas where silence is a “must” (hospitals, rest homes, ...)

Chemical Mixing System: the operator can easily select by control board the right detergent ratio for every cleaning task. Maximum flexibility and performance

TOUCH ADVANTAGES

Round 45 TOUCH can be moved and controlled only using a thumb: this is intuitive, user friendly and reliable. Less service costs: sensor technologies means less mechanical parts in the traction/movement system of the machine; this guarantees a higher reliability and decreases the maintenance costs (less “breaking” risks, no need of too many spare parts, easier anyway to be replaced)

ECO System: by pressing the Eco button, all the working functions previously selected (water, concentration of the chemical, power intake) are arranged for the best optimization of consumption. Ecology and savings in any working condition!

TOUCH System: When the user lightly touches the main sensor only using a thumb, all the working functions of the machine are activated

INNOVATION AND PERFORMANCE

Round 45 is the last news in the Ghibli's scrubber dryers range. The innovative and functional design makes the machine ergonomic and easy to use in the daily activities. The technical features and the high level innovations – 45 liters tank capacity, three hours running time, the control panel with display, the double brush pressure, the silent mode function and the new chemical mixing system – make Round 45 something unique in its market segment, ideal for effective cleaning results in every kind of floor/environment.

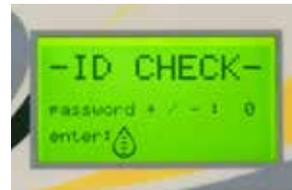

And now it is even more innovative and efficient thanks to the TOUCH sensor, and the new ECO SYSTEM for the reduction of energy consumption and respect for the environment.

Control panel with display.

INNOVATION AND CONTROL:

all the main working functions can be managed directly by the control board. Thanks to the display, the user can easily and constantly check the Round 45 status.

Access password (it can be enabled on demand)

TOUCH SYSTEM:

the main sensor is located in the center of the handle. When the user touches the sensor a signal is sent directly to the electronic board: all the working functions of the machine are activated and Round 45 TOUCH starts to work.

MANOEUVRABILITY:

The pivoting wheels under the chassis ensure the best manoeuvrability and control. It allows Round 45 TOUCH to work in every type of environment.

Pivoting wheels under the chassis and their short distance

PRODUCTIVITY:

45 liters tank capacity, the wide cleaning path (**530** and **600 mm**, depending on the variant), the great running time (**3 hours**), the remarkable speed (up to **5 km/h**). High quality features which combined together ensure the maximum productivity. For an easy daily job in any kind of surface/area.

Adjustable and compact squeegee.

PERFORMANCE:

the **double brush pressure** and the chemical mixing system ensure the right flexibility and the best cleaning results. The powerful vac motor combined with the efficient **squeegee system (compact and adjustable)** guarantee top drying performance even in hard to clean areas

Double brush pressure (by pedal).

Day cleaning.

SILENT:

as soon as you push the **silent mode** button on the control panel, Round 45 becomes immediately more "quiet", without losing its performance. Ideal for **day cleaning** and in all the environments (hospitals, schools, ...) where silence is strictly required.

Solution tank.

CHEMICAL MIXING SYSTEM:

all the Round 45 battery models can host the **detergent system** (standard or optional, depending on the variants). The operator can set up the chemical ratio directly by the **control panel**. Flexible, precise and efficient.

ECO SYSTEM:

Round 45 TOUCH is the scrubber dryer designed to respect the environment!

Thanks to the new ECO SYSTEM, easily to be selected from the control panel, consumption is reduced to a minimum with the best cleaning performance.

- Water flow reduction for the best optimization of consumption
- Detergent reduction: maintaining the highest standards of cleaning in full respect of the environment
- The best suction performance with low noise, and high energy savings

Reduction of consumption, respect of the environment and avoiding wastes thanks to the new ECO SYSTEM
